LEGRAND’S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites
  Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

• Offer our customers environmentally friendly solutions
  Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design and provide informations in compliance with ISO 14025
  Reduce the environmental impact of products over their whole life cycle.
  Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

PRODUCTS CONCERNED

The environmental data is representative of the following products [see extrapolation rule at the end of the document]:

RFB2E, RFB4E, RFB6E, RFB2E-OG, RFB4E-OG, RFB6E-OG
CONSTITUENT MATERIALS
This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/CE.

<table>
<thead>
<tr>
<th>Total weight of Reference Product</th>
<th>236.12oz (6694.0g) [with unit packaging]</th>

</tbody>
</table>

Estimated recycled material content: 35 % by mass. Powder painting for OG versions represents less than 0.5% of the total mass.

MANUFACTURE
This Reference Product comes from sites that have received ISO14001 certification.

DISTRIBUTION
Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. The Reference Product is therefore transported by truck from our warehouse to the local point of distribution into the market in North America, over a maximum range distance of 2175 miles (3500km).

INSTALLATION
For the installation of the product, only standard tools are needed.

USE
Servicing and maintenance:
Under normal conditions of use, this product requires no servicing or maintenance.

Consumables:
No consumables are necessary to use the Reference Product.

END OF LIFE
Development teams integrate product end-of-life factors in the design phase.

Hazardous waste* contained in the product: no hazardous waste

(*) Hazardous waste as defined by European Commission decision 2000/532/EC.

Recycling rate:
Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the product is estimated as 99.3 %.
This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:
- metal materials (excluding packaging) : 77.2 %
- plastic materials (excluding packaging) : 3.0 %
- packaging (all types of materials) : 19.8 %
Product Environmental Profile

Wiremold® RFB4E Series Multiservice Recesed Steel Floor Boxes

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. It is representative from products marketed and used in North America.

For each phase, the following modelling elements were taken in account:

Manufacture  Packaging taken into account. As required by the «PEP ecopassport» programme all transports for the manufacturing of the Reference Product, including materials and components, has been taken in account. The waste generated during manufacturing phase has been taken into account.

Distribution  Transport between the last Group distribution centre and an average delivery to the sales area. 2175 miles (3500km), generic data as defined by the PCR version: PEP-PCR-ed 3-EN-2015 04 02.

Installation  The end-of-life of the packaging is taken into account at this phase.

Use  • Under normal conditions of use, this type of product requires no servicing or maintenance.
• No consumables are necessary to use this type of product.
• Product category: PSR0003-ed1.1-EN-2015_10_16-Cable_Management_Solutions §3.2.3.1. Non-equipped service poles, service posts and multi-outlets extension.
• Use scenario: no energy consumption during 20 year working life. This modelling duration does not constitute a minimum durability requirement.
• Energy model: Electricity Mix; United States - 2009.

End of life  The default end of life scenario maximizing the environmental impacts.

Software and database used  EIME V5 and its database «CODDE-2015-04» and the indicators defined in the PCR ed3 in alignment with the EN 15804 standard.

% ENVIRONMENTAL IMPACT PER LIFE CYCLE STAGE OF REFERENCE PRODUCT

For products covered by the PEP other than the Reference product, the environmental impacts of each phase of the lifecycle are calculated with the following table.

The environmental impacts for On-Grade (-OG) versions are considered as the same than the environmental impacts of RFB Series Floor Boxes for concrete floor only (the powder painting does not have a significant impact on calculation).
